

Brain Boosters™ Professional Development Training **10 Strategies to Help All Students Succeed**

Tuesday, November 27
4:30pm-6:00pm

Triad Math & Science Academy
700 Creek Ridge Rd.
Greensboro, NC 27406

Are you frustrated by students who fidget, constantly need to be redirected and distract others? Do you have a handful of students who demand all your time? Ever wonder why certain students struggle with anxiety and anger?

Today's educators must deal with situations and issues unimaginable even a few years ago. Studies indicate that up to 70% of students may be affected by one or more of the following: anxiety; distraction and difficulty attending; sensory integration; impulsivity; emotional and behavioral impacts; and bullying.

Celebrate Calm Director of Education, Kirk Martin, will be addressing these issues during our Professional Development day. Martin has trained over 150,000 parents and teachers and specializes in working with intense children, including those affected by Anxiety, Sensory issues, Aspergers, Autism, ODD, OCD and AD/HD.

The organization's Brain-Boosters™ Workshops combine forty years of scientific research with cutting-edge insight into the human brain to provide practical, 21st century tools for educators:

- 15 practical interventions to improve attention and retention.
- Behavior plans that build confidence and work long-term instead of reinforcing negative behavior.
- The correct way to calm an angry, frustrated or violent child.
- How to turn distracting, impulsive students into classroom leaders.
- Transfer ownership of academic and behavioral success to students.

***We want to customize the training based on your needs and what is happening inside your classrooms. Please email Kirk@CelebrateCalm.com with specific questions or situations that you would like him to address. Your questions will be private.**
